The name AutoCAD Full Crack is derived from the Latin word autocad (autocadentis, "self-cadenter"), which was coined by Mary Sutherland, a U.S. artist and illustrator who created a collection of "AutoCAD" drawings in the early 1980s. She based the term on the mechanical term "self-cadenter" which applies to a machine that would generate a design in three-

dimensional space using a drafting compass. Early History In 1982, Autodesk was founded by Richard S. Baker, Peter S. Denning, and Susan M. Gillett. Baker and Gillett were both graduates of the University of Michigan where they were classmates of Bill Gates. The two met through Bill Gates and had formed a company by the name of the Michigan Center for the Study of Information. They started to meet at the Ann Arbor

Main Library where they started to use the library computers to write their software. In 1984, Dick Day of the University of Michigan, who had developed the software for the Graphic Systems Time-sharing and Operation System (GTS/TOS), contacted them. Baker convinced the three founders of Autodesk to work for the newly formed Autodesk. Towards the end of 1982, the founders of Autodesk gathered in their rented office on Franklin

Road in Ann Arbor. Originally, they met there, they rented the office, and they shared a home with another employee. They started with a drawing board, a computer, and a printer. In January 1983, Autodesk hired its first employee, Mary Sutherland, who came from U.S. Patents, Inc., a company located in Ann Arbor that handled U.S. patent licensing. With her co-employees, she met her husband, Jon Sutherland. Their job at Autodesk

involved creating drawings, or drafting, with computer-aided design software. Their first product, Autocad, was officially released in December 1982. The company had a capitalization of $45 million with 32 employees in its first year. They continued to grow, reaching $175 million in annual revenues by 1986. The number of Autodesk users grew from just over 100 in 1982 to just over 1 million in 2010. Three of the company's first product

licenses were sold. Since 1982, Autodesk has had a customer base in excess of 2 million users
