The major microvascular complication of diabetes mellitus is retinopathy, which is a leading cause of blindness in the United States. Coronary heart disease and peripheral vascular disease are also important causes of morbidity and mortality in older adults. It is unclear whether older women with microvascular disease are at greater risk for cardiovascular morbidity than men. More clinical data are needed to understand how to prevent microvascular disease in older women.// detail/signal_init.hpp // ----- // Copyright (c) 2003-2018 Christopher M.
