The increasing number of older persons hospitalized creates a growing problem of hospital quality. To assess quality of care of patients hospitalized in a geriatric unit as assessed by health professionals and caregivers. In-depth interviews were conducted with nine health professionals. Questionnaires were completed by 85 caregivers. Data were analyzed using NUD*IST 2.2 software. Health professionals interviewed were mostly nurses and head nurses (n=7). The quality of care of patients (n=32) assessed by health professionals was classified as good in 80% of cases. In-depth interviews revealed five main themes of good care: social values, information and education, physical environment, quality of care and staff attitude. Caregivers (n=85) assessed in-depth interviews the quality of care of 55 patients as good. Caregivers also identified five main themes of good care: social values, information and education, physical environment, quality of care and staff attitude. Health professionals evaluated the quality of care in 40 cases. Caregivers evaluated the quality of care in all the cases. In-depth interviews showed that 53% of the poor evaluation cases concerned medical and/or ethical issues related to the patients, including the burden of care, after-hours problems, death of a patient or a problem in family-to-family meetings. Health professionals and caregivers considered that the quality of care of older patients was satisfactory, especially when their needs were taken into account by health professionals and caregivers. However, certain medical and ethical problems could be improved.Q: How can I prevent HTML escaping in a prettyprint directive? I have a prettyprint directive to format my a1d647c40b

What's New In?

Advanced Multi-CAD Integration: Combine your design with another drawing on the same project. Simultaneously update your model in both documents and display both at once. (video: 1:05 min.) Next-Gen Workflows: You can now work on both your draft and review drawings in parallel, taking advantage of a new (fully integrated) "Draft" mode and "Review" mode. You can also add custom annotations and comments directly to the same drawing, and review those comments in real time as you draw. (video: 2:05 min.) Advanced Modeling Tools: Re-engineer your entire drawing in seconds, not hours, using auto-generation, straight forward tools and freeform areas. (video: 1:10 min.) Create hyperlinks to other drawings. Now you can attach any file type you want, right within your drawing, and insert hyperlinks to direct viewers to additional drawings. (video: 2:30 min.) Create smart drawings using templates. Use these templates to quickly generate drawings that include your selected settings, colors, and fonts. (video: 1:30 min.) Freeform areas: The new Freeform area lets you create non-rectangular, overlapping shapes that can connect to your shapes as well as to others on the same drawing. (video: 1:05 min.) You can now draw text directly onto objects in your drawing. (video: 1:20 min.) Remove the need for grid lines. Now you can draw freeform shapes without worrying about grid lines. (video: 1:20 min.) Contextual Help: Just-in-time help—no matter where your cursor is. New contextual help offers a list of help for the selected object, and the ability to highlight text so you can quickly insert the appropriate help topic. (video: 1:25 min.) A New Default Color Palette: Get 3 times more color options than before. New palettes included in the release are Sunset Orange, Sea Fog, and Colorado Wildflowers. (video: 1:35 min.)
