## CC Print Monitor

It does following things: 1.It lists all the documents, which have been printed on the network share. 2.It intercepts all the "Print" jobs sent to the spooler and stop it (if it is wished) until authorization. 3.It allows to view all the previously printed documents and their properties (pages, count of pages, security, etc...). 4.It allows to print documents at defined interval. 5.It gives you ability to control the CPU speed and the over-all performance of the network share. 6.It permits to save the documents in a specified directory. 7.It permits to create a log file with messages. Document Uploader Description: It is a small program for work with any type of file (document, image, video, etc...). The program detects file type and authorizes user for work with this file (upgrade, rename, copy, delete, compress, move, etc...). After successful authorization, user can upload files to the network share using ftp. All files are encrypted using AES encryption (128, 256 and 512-bit). Document Converter Description: The program allows to convert (and possibly to edit) any type of document to any other document. It enables you to convert image files to pdf, doc, docx, xps, odt, etc... and other image files to doc, docx, pdf, etc... It supports all the file formats used by Windows. Document Copy Utility Description: It is a small program for work with all types of files. It supports all the formats used by Windows (doc, docx, xls, xlsx, ppt, pptx, pps, ppsx, odp, pptm, pdf, djvu, html, csv, rtf, txt, dvi, sz, zip, pst, dng, eps, tef, jpeg, jpg, bmp, gif, mp3, mpeg, mpg, mov, mpeg4, mp4, oga, oas, ogg, ogm, wmv, wav, wma, wmf, wnz, 3gp, 3g2, xwmv, flac, au, mp4, xps, 3gp, avi, mov, wmv, wnz, wma).

## What's New In?

Possibility to configure the file lists and the log. Impressions control. Let print job from the windows that has opened with a file, or by a printer. After sending the first document, when a document is finished printing, the program stopped the job with an authorization message. Program flow: 1/ Interception of print jobs from the system spooler. 2/ Activation of the log. 3/ Configuring the file lists and the log. 4/ Opening of the list of documents. 5/ Send the list of documents to the spooler. 6/ Control of the job sent by the spooler. 7/ Sending the message "The job has been stopped by authorization". 8/ Closing of the list of documents. Key words: Imprint/Impressions/Printing/Spooler/Job/Registry/Tasks. For beginners: 1. Pressing the Ctrl + F11 keys enables the log. 2. Pressing the F12 key enables the file list. 3. Pressing the F1 key opens the help window.
